Shooting Star

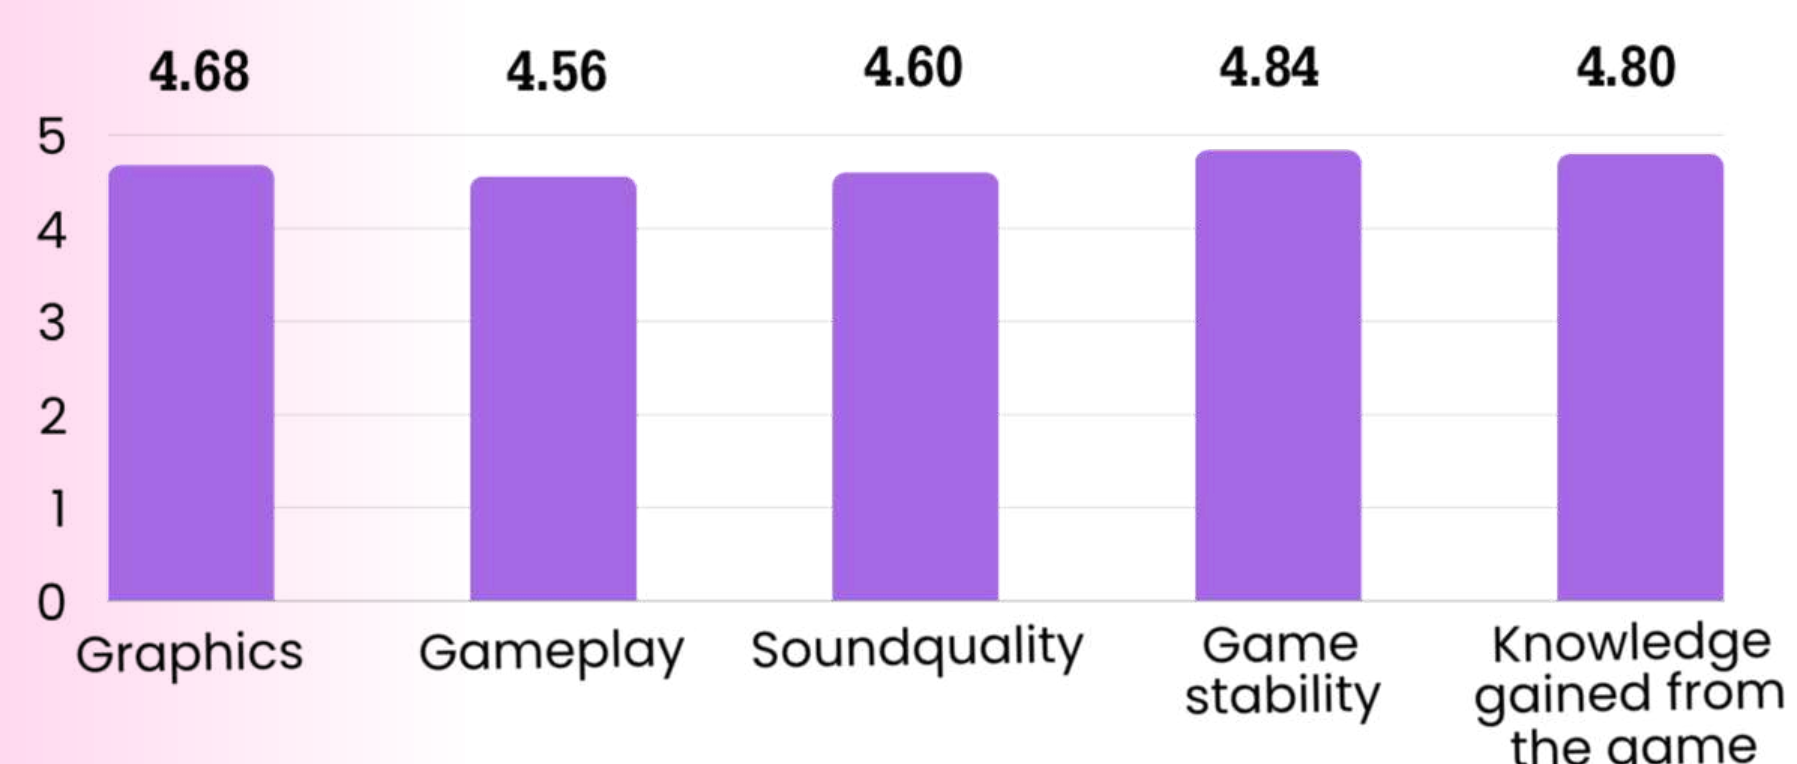

## PERFORMANCE

## OBJECTIVE

- 1.To create a mental math game called Shooting Star.
- 2.To provide enjoyment and knowledge for players.
- 3.To train and develop players' analytical thinking skills.

## RESULTS AND DISCUSSION

Feedback from Survey Respondents

The analysis and design of the Shooting Star game system have been successfully completed, meeting the set objectives. The game aims to enhance enjoyment while fostering interest in developing analytical thinking skills, which are important in daily life. The Shooting Star game features a colorful, visually pleasing design that makes playing more enjoyable and engaging.

## CONCLUSION

Through the study, analysis, and design of the Shooting Star game program, we gained an understanding of the system's working process. The game has become an influential part of Thai society, especially for Thai youth. The knowledge and experience gained from this study were used to systematically develop the game. This process also helped the developers understand various issues and find solutions. System analysis and design require careful planning, along with a solid understanding of the system's operation to ensure efficiency in development.
